## OCR&GC RANGE RULES OPEN BOOK QUIZ

November 19<sup>th</sup>, 2019

**MINIMUM PASSING SCORE IS 90%**

Use **ONLY 21 August 2013** version of Range Rules to answer this quiz.

**CIRCLE BEST LETTER on multiple choice. CIRCLE TRUE or FALSE on T/F questions.**

1. Rifle and pistol projectiles must impact what and where?

- a. In a general downrange direction.
- b. The impact berm below horizontal midline but above the berm toe.
- c. Any place on the range except at my fellow members.
- d. At the empty soda can placed halfway downrange.

2. It is okay to point the muzzle of a firearm in any direction during loading, unloading or while making adjustments or repairs.

TRUE  
FALSE

3. When firing is underway on a range, who must be utilizing adequate properly fitting eye and ear protection?

- a. Anyone within 3 feet of the shooter.
- b. Only the person actually shooting the firearm.
- c. All those beyond the signed points.
- d. Use of eye and ear protection is always optional.

4. Steel targets utilized must be of factory grade quality and must be (*pick choice below*).

- a. Reactive (moves to bullet impact) and at least 10 yards away from the shooter during casual practice.
- b. Fixed so the steel may not move when impacted by bullets.
- c. Set to briskly bounce fired bullets back to the shooter.
- d. As near to the shooter as desired.

5. Any firearm loaded with birdshot may be fired at the Club's whiteboard target holders.

TRUE  
FALSE

6. The use of the red/green warning light system on the 100/200 Yard Rifle Range is not required if only one shooter is utilizing that range.

TRUE  
FALSE

7. The wooden and metal side walls of the 25 Yard Bays are designed as primary bullet impact surfaces. It is okay to place targets so that bullets passing through targets continue to hit the side walls or that bullet impact splatter from steel targets hit them.

TRUE  
FALSE

8. In the Shotgun Area, it is standard safe practice to close the action of a semi-auto or double barrel shotgun at anytime and anywhere, if the shooter is on or near any skeet or trap field.

TRUE  
FALSE

9. In the Shotgun Area, it is okay to save time on the shooting pads by loading the magazine tube with shells while waiting to shoot under a range cover or while approaching a shooting pad.

TRUE  
FALSE

10. In the Shotgun Area, if the clay bird release mechanism is in the hands of a puller

- a. You must shout loudly "hold tight onto the release" when walking past a body-height clay bird launching door.
- b. You will be okay if you quickly pass a clay bird door, just don't look at the clays inside.
- c. You may not pass in front of a skeet low house or a trap clay bird door on a skeet or trap field.
- d. It is okay to walk slowly in front of the clay bird launching door while watching the throwing arm for any motion.

11. When utilizing the Club's Shotgun Patterning Boards, it is permissible to shoot any size shot at the appropriate pattern target.

TRUE  
FALSE

12. When using the Bench Room of the All-Weather Shooting Building, it is mandatory that the red/green light system must be utilized, even if only one person is using the Bench Room and no other shooters are present outside on the 100/200 Yard Range.

TRUE  
FALSE

13. When the temperature outside is above 70 degrees F. but below 95 degrees F. it is okay to swim in any Oil Capital Lake or Marsh.

TRUE  
FALSE

14. In the Archery area,

- a. It is okay to shoot at 3-D targets ONLY with broadhead points, but not the other targets.
- b. It is okay to shoot at the regular target butts with broadhead points, but not the 3-D targets.
- c. It is never okay to use broadhead points on either 3-D or regular target butts.

15. In the Rifle/Pistol Range area, when individuals are downrange, it is

- a. Always permissible to handle firearms behind them, as long the muzzle is not pointed at those downrange or at other benches.
- b. Safe to handle guns at the benches or behind the shooter, if the action remains open.
- c. Okay to leave actions closed and the gun chamber loaded, if the mechanical safety is engaged.
- d. Never permitted to handle/touch a firearm under this circumstance. Handling separated detached parts of a firearm, including loading magazines is okay.
